

For the video player to work in Google Chrome:

1. Click on the shield next to the star in the address bar.
2. Click on load unsafe scripts (see image below).

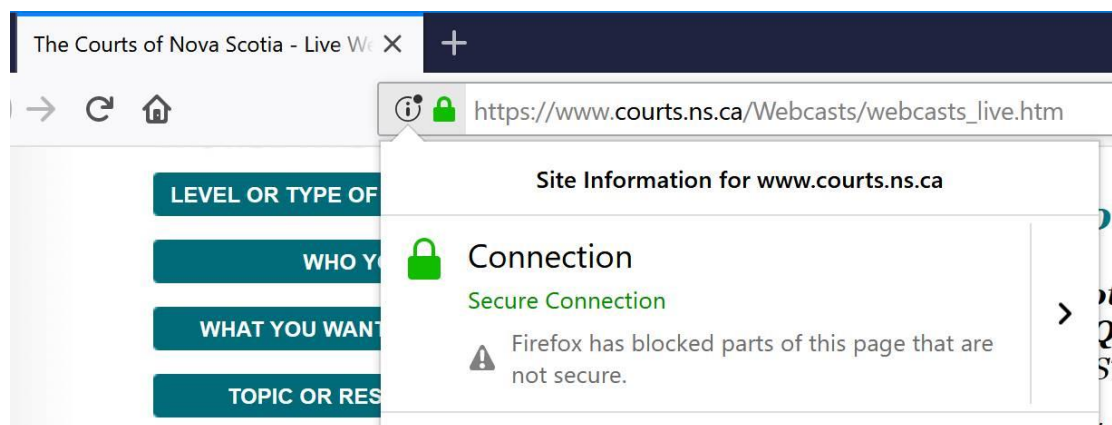

This will reload the page and allow you to view the video. You should then see a warning message in the address bar that site is unsecure (see image below).

For the video player to work in Firefox:

1. Click on the i next to the green padlock (see image below).
2. Click on the "greater than" symbol.

3. Click on Disable protection for now (see image below).
